

Junior Hardware Designer - Liquid Rocket Engine

Description

SFU Rocketry is seeking Junior Hardware Designers to join our Liquid Rocket Engine (LRE) team. This team is responsible for developing the main electrical control and feedback systems involved in SFU Rocketry's primary project. You will be at the forefront of the technology being developed by SFU Rocketry! LRE is currently upgrading our main control system with new hardware, improving data acquisition and controlled actuation of solenoids and turbopumps, regenerative cooling, and eventually producing hardware for flight-capable rockets. This position is primarily a PCB designer role, and is an excellent way to learn and sharpen your electrical design skills that are not taught in academics.

Duties & Responsibilities

- Determining requirements and specifications for new LRE subsystem
- Architecture of the main LRE systems
 - Assisting with LRE subsystems
- Schematic capture, PCB layout, PCB assembly
- Contributing to hardware design reviews
- Testing and validation of hardware systems
- Integration of validated hardware into main LRE systems
- Implementing design changes and improvements to existing hardware
- Contribute with a minimum of 3 hours of work and 1 hour of updates per week

Key Qualifications

- Basic electronics knowledge (breadboarding, voltage and current concepts, safety)
- Experience in Altium Schematic and PCB Design Software is a strong asset
- Basic LTSpice experience
- Serial communication protocols (SPI, I²C, UART, etc) is an asset
- Must be able to work independently and within teams
- Creativity, ability to think outside the box, is a strong asset
- Self-starter, inspired to initiate action
- Professional communication skills, verbal and written
- Motivation and willingness to self-learn!

Education & Experience

- Students pursuing an Electronics Engineering, Electrical & Computer Engineering, Mechatronics Engineering, or equivalent undergraduate or graduate degree at Simon Fraser University (preferred)
- Preference for first or second year if in undergraduate studies
- Faculty or staff members of Simon Fraser University are welcome to apply
- Preference for this role given to those with related experience in key qualifications, though all levels of experience are encouraged to apply

Job Details

- Part-Time / Casual
- Volunteer Student Design Team Position
- Hybrid - Surrey SFU Engineering Building
- Commitment for a minimum of 9 months after onboarding
- Frequent promotion opportunities for Senior and Lead positions

Statement from SFU Rocketry

SFU Rocketry is an inclusive and equal-opportunity organization. We welcome, include, and respect all regardless of race, colour, ancestry, place of origin, religion, family status, marital status, physical disability, mental disability, sex, age, sexual orientation, gender identity or expression, political belief, or conviction of a criminal or summary conviction offence unrelated to employment.

SFU Rocketry is Simon Fraser University's largest and most comprehensive design team, and has a strong reputation to uphold. Our members are highly sought-after and have been actively recruited for permanent and co-op intern industry positions. We operate as a professional organization, where professional conduct is required and expected from all SFU Rocketry members at all times.
